Tax Year 2012 Reminders

Common Problems and Suggestions:

- 1. The Primary SSN, Secondary SSN, Student SSN, and Employee's SSN must be in the valid range established by the IRS and numeric only. (Many returns had SSNs like 'APPLIED', '1111111111' and '999999999').
- 2. Conserve space in the 2-D barcode do not include empty or blank schedules or attachments. The record layouts for schedules and attachments are only to be used for tax returns that have line amounts on the schedules and attachments.
- 3. We continue to receive returns with missing W-2 information in the barcode. The Employer's FEIN, State Name, State Wages and Tip fields must be in the barcode when withholding is present. In addition, ensure all W-2 forms are included in the barcode.
- 4. Information from a previous taxpayer was included in the barcode. Please ensure the software clears all taxpayer information before starting on the next taxpayer.
- 5. Punctuation was included in the barcode in the Name and Address fields (e.g., O'Day should be Oday; 8 Hay Ct. should be 8 Hay Ct).
- 6. Decimals were included in the barcode in the money amount fields (e.g., 100.00 should be 100).
- 7. Dates should always be a valid date within the tax year. The date should be between 01/01/2012 and 12/31/2012.
- 8. Do not generate a barcode of the taxpayer is paying tax to another state while an Illinois resident. (IL-1040 Line 16 *cannot* be greater than zero.)

Reminders:

- 1. We allow returns for deceased taxpayers. Your software should output "**Deceased**" and the date of death above the corresponding Social Security Number (SSN). Example: **Deceased 10/10/2012**. Include this information in the 2-D barcode.
- 2. No special characters are allowed in the barcode, unless otherwise noted.
- 3. Please do not make any changes to the paper return after the 2-D barcode is generated.
- 4. Print the IL-1040-V, Payment Voucher for Individual Income Tax for all balance due returns.
- 5. If attachments are present, be sure to include attachment line amounts and data in the 2-D barcode.
- 6. If your software gives the taxpayer an option, the Department prefers the default be set to print the 2-D barcode.
- 7. Do not generate a barcode if
 - -there are more than thirty (30) W-2 forms. -there are more than thirty (30) W-2G forms. -there are more than ten (10) 1099-R forms.
 - -there are more than nine (9) 1099-G forms. -there is more than one (1) Schedule ICR. there is more than one (1) Schedule G.
 - -there is a Schedule CR with an amount > zero -more data is present than the barcode can contain.
- 8. Please remind taxpayers to send the original 2-D barcode return and payment voucher (if applicable) to the proper address.

Introduction and Barcode Sequence

At this time, there are a variety of different barcode languages called symbologies, Each symbology has strengths and weaknesses. The various type of barcodes are characterized by their unique pattern of bars and spaces to represent characters. The start and stop bars at both ends of the symbol are also unique.

PDF-417 is a two-dimensional barcode that can store up to 1,800 printable ASCII characters of 1,100 binary characters per symbol. However, for technical reasons, the expected number of characters for tax applications is approximately 1,200 characters.

- The minimum Y/X ratio of the barcode element should be 2.
- The minimum error correction level should be 4.
- The minimum DPI for the barcode is 400.

Field Explanations

The following discloses the various characters that are allowed in returns filed with a 2-D barcode.

- Unsigned numeric fields leading zeros may be dropped, except for date and percentage fields.
- Signed numeric fields leading zeros must be dropped. For negative values the minus sign ("-")must be present to the left of the number.
- Alphanumeric fields should be left-justified and no leading blanks. Trailing blanks may be dropped.
- Fields defined as having literal values only the literal value (including embedded blanks) must be supplied.
- Delimit each field with a carriage return.

Allowable Characters in Returns with 2-D Barcodes:

Alpha A-Z – Upper case alpha characters only. Literals must be as shown in the record layouts. *No punctuation or special characters, unless otherwise noted.*

Numeric 0-9 – Numeric characters only. Right-justified and zero-filled. **No punctuation or special characters.**

• **Money Fields** – Maximum 9 characters for positive numbers, 8 characters for negative numbers (if applicable) with a leading sign.

- **ZIP Codes** should be left-justified.
- Dates Y = Year, M = Month, D = Day in YYYYMMDD. Valid dates only, within the tax year.
- Social Security Number (SSN) / Individual Taxpayer Identification Number (ITIN) –
